

2005 Big Mac Car Crusher

Model: Big Mac Car Crusher

Year: 2005

Serial #: 1325-12005

Hours: 1613

Engine: John Deere Diesel

Price: \$ 125,000.00

This 2005 Big Mac car crusher is in excellent condition and is ready to roll on the job.

Specifications:

Bed:	Length	19' 10" (6.0m)
	Width	7' 6" (2.3m)
	Lift	7' 6" (2.3m)
Overall:	Length	41' 0" (12.5m)
	Width	8' 0" (2.4m)
	Height-travel	13' 5" (4.1m)
	Height-operating	20' 7" (6.3m)
	Weight-operating	56,000 pounds (25,400kg)

Engine: John Deere Model 6068T
Cummins Model 6BTA5.9

Hydraulic System: 90 GPM at 2000 RPM
System pressure-2400 PSI (166 Bar)
Force per cylinder- 153,000 pounds (69,400kg)
Total combined cylinder force - 306,000 pounds
(138,801kg)
Port reliefs set at 2600 PSI (179 Bar)
Cycle time – 45 seconds

The mobile, or "Big MAC", can cover hundreds of miles, moving from location to location as needed, or can simply be moved across town to serve several local yards. Easy to operate, with minimal working parts, the MAC flattens entire autos in one process. Three or four scrap automobiles-with or without engines-can be pressed into 30" high bundles which are easily loaded on trailers for shipment to market. Loose fenders, doors, etc., are compressed into the bundles, giving full measure to the recycler and leaving areas clean and debris-free. Time-consuming cleanup is eliminated. Each machine is equipped with an oil reclamation system and all machines come with remote control for ease of operation directly from a forklift or other loading device.
